

**FOR IMMEDIATE RELEASE**

**HATTERAS NETWORKS' HN6100 PLATFORM WINS 2009 SUPERCOMM  
EOS AWARD FOR TECHNOLOGY INNOVATION**

Innovative HN6100 enables carriers to deploy Ethernet services and mobile backhaul solutions from a single platform

**SUPERCOMM, OCTOBER 22, 2009** – Hatteras Networks, the global leader in multi-service Ethernet solutions for enterprise access services and next-generation mobile backhaul, announced today it has won the 2009 SUPERCOMM Eos Award for Technology Innovation in Access Networking with its new HN6100 multi-service platform for Ethernet business services and mobile backhaul. The Eos Awards were presented at a ceremony at the SUPERCOMM show on October 21.

“The criteria for winning the Eos Award for Technological Innovation in Access Networking, are whether the product will have a profound impact on the market, whether it is something truly new and whether the product will likely produce a solid return on investment for the customer,” said John Salak, President, The Salak Group, which produced the Eos awards at SUPERCOMM. “The new Hatteras Networks HN6100 multi-service platform for Ethernet business services exemplifies these values as a new product that will make a broad and meaningful contribution to furthering Ethernet business services.”

The HN6100 is the industry’s first modular, multi-service platform designed to enable rollout of any carrier Ethernet service, over any media, via any port or slot, from one compact, 2 RU, ultra-dense chassis. This unique platform enables carriers to simplify deployment, integrate management cost-effectively and reduce the number of vendors in their networks. Through this new Hatteras Networks solution, carriers are able to capitalize today on revenue opportunities throughout their service footprint while undergoing a seamless, cost-effective transition to all-Ethernet service delivery.

“Hatteras Networks is committed to the success of our customers and we are always striving to exceed expectations in product innovation and feature set,” said Vijay Raman, Vice President of Marketing and Product Line Management, Hatteras Networks. “We are honored that the HN6100 has attained the Eos Award for Technology Innovation based on its true innovation and impact on the market.”

**About Hatteras Networks**

Hatteras Networks is redefining the way carriers think about Ethernet services. Hatteras Networks' Carrier Ethernet service delivery solutions are leading service providers worldwide to a significant expansion of the Metro Ethernet market, which had previously been limited by legacy technologies in the access network. Now service providers are empowered to cost-effectively offer 100 Mbps Ethernet services over existing facilities, enabling businesses to migrate from legacy networks to transparent Ethernet services for voice and data business connectivity, infrastructure backhaul and mobile wireless backhaul solutions.

Already deployed on five continents, Hatteras Networks Ethernet solutions are enabling a market expansion for carriers that is as significant for business services as "triple play" is for residential. For more information, visit [www.hatterasnetworks.com](http://www.hatterasnetworks.com).
