

For Immediate Release

HATTERAS NETWORKS HN6100 AND HN600 SOLUTIONS TAKE TOP HONORS

TMC recognizes innovative solutions with 4GWE Wireless Backhaul Distinction Award

RESEARCH TRIANGLE PARK, NC, December 2, 2010 – Hatteras Networks, the global leader in multi-service Ethernet solutions for enterprise access services and next-generation mobile backhaul, announced today that its HN6100 Multi-Service Delivery Platform and HN600 Series with PWE3-Plus have earned the 2010 Wireless Backhaul Distinction Award. Technology Marketing Corporation (TMC), a global, integrated media company, in conjunction with Crossfire Media, presented the awards via its 4GWE website. The announcement marks the latest addition to Hatteras' series of industry award wins and honors.

“Hatteras Networks deserves the acknowledgment for their achievements in advancing 4G and providing solutions in the marketplace. The HN6100 and HN600 Series with PWE3-Plus have proven that its customers experienced success from utilizing these wireless backhaul technologies,” said Carl Ford, co-founder and community developer, Crossfire Media.

The limited population of fiber- and microwave-enabled cell towers is a primary gating factor in the delivery of high-speed broadband services, with a majority of wireless communications towers relying solely on copper connections. Hatteras Networks' integrated mobile backhaul solutions bridge the fiber and microwave gap by offering efficient, reliable high-speed transport across existing copper infrastructures at mobile communications towers and exchange centers. With patented capabilities for simultaneous transport of native Time Division Multiplexing and native Ethernet traffic over copper infrastructure with embedded synchronization timing, the HN6100 and HN600 Series deliver greater than 10 times the bandwidth at one-tenth the cost of legacy technologies, allowing immediate rollout of next-generation mobile broadband services by mobile wireless service providers worldwide.

“With continued surging growth in smartphone use, operators are facing extreme demands for greater, more reliable broadband access, even as cell tower capacities are being stretched to

the limit. Mobile backhaul is a simple, elegant answer to the complexities of the voice and data overload challenge,” said M. Vijay Raman, Vice President of Product Line Management and Marketing, Hatteras Networks. “Hatteras Networks is very pleased that our HN6100 and HN600 Series with PWE3-Plus have been recognized as the industry’s best high-performance, carrier-grade mobile backhaul platforms.”

About Hatteras Networks

Deployed by nearly 200 Tier 1 and Tier 2 service providers on six continents, Hatteras Networks is a market-leading global supplier of integrated multi-service Ethernet networking and communications solutions. Hatteras Networks’ award-winning product and service portfolio encompasses a broad range of innovative technologies addressing multiple markets including WiFi, DSLAM, Metro and Carrier Ethernet, and infrastructure and mobile wireless backhaul. Hatteras Networks’ scalable, high-bandwidth 2 Mbps - 100 Mbps solutions are helping carriers seamlessly navigate the copper-to-fiber Ethernet access evolution process, while simultaneously allowing them to deliver reliable, cost-effective Ethernet services for voice and data business connectivity. For more information about Hatteras Networks and its solutions, please visit www.hatterasnetworks.com.

About TMC

Technology Marketing Corporation (TMC) is a global, integrated media company helping our clients build communities in print, in person and online. TMC publishes Customer Interaction Solutions, INTERNET TELEPHONY, Unified Communications, NGN and InfoTECH Spotlight magazines. TMCnet, TMC's Web site, is the leading source of news and articles for the communications and technology industries.

For more information about TMC, visit www.tmcnet.com.

About Crossfire Media

[Crossfire Media](#) is an integrated marketing company with a core focus on future trends in technology. We service communities of interest with conferences, tradeshow, webinars and newsletters. Crossfire Media services also include providing insight to technology companies and associations to assist in the development of business and technical strategy as well as the development and implementation of effective communications and marketing strategy. To implement communications and marketing strategies, Crossfire Media utilizes a variety of physical and virtual experiences including web, publications, face to face events, and webinars.

Crossfire Media has a partnership with Technology Marketing Corporation (TMC) to produce events and websites related to disruptive technologies. Crossfire Media is a division of Crossfire Consulting, a full service Information Technology company based in New York.
