

FOR IMMEDIATE RELEASE

**HATTERAS NETWORKS EXPANDS MANUFACTURING CAPABILITIES WITH
SANMINA-SCI**

*Tier 1 electronics manufacturer provides the scalability required to support global demand for
Hatteras Networks' Mid-Band Ethernet portfolio revenue ramp*

RESEARCH TRIANGLE PARK, NC, JUNE 14, 2007 — Hatteras Networks™, the Mid-Band Ethernet™ market, technology and services leader, today announced that Sanmina-SCI® Corporation, a world leader in electronics manufacturing, is now the exclusive producer of Hatteras Networks' entire Mid-Band Ethernet product line.

“The market for Mid-Band Ethernet equipment is growing exponentially,” said Kevin Sheehan, President and CEO for Hatteras Networks. “Outsourcing manufacturing operations with a global Tier 1 electronic manufacturer such as Sanmina-SCI enables us to optimize efficiencies while continuing to provide world-class products to our customers. Both are part of our overall company strategy for long-term success.”

Sanmina-SCI has facilities strategically located in key regions throughout the world with major global operations in 19 countries on five continents. SCI's state-of-the-art manufacturing capabilities and world-class distribution centers enable Hatteras Networks to compete at the highest level with the largest equipment suppliers in the world.

With market-leading service management capabilities, Hatteras Networks gives carriers the ability to create and offer a rich portfolio of managed services (e.g., Ethernet private line, Transparent LAN services, Voice-over-IP, Direct Internet Access and virtual private networks) to the end-user community. These services are delivered seamlessly over the existing last-mile copper infrastructure, effectively bridging the existing T1/E1 – T3/E3 service gap with a more resilient, cost-effective, service-enabling architecture.

Visit Hatteras Networks at NXTcomm, June 19th to 21st, in booth #4263.

About Sanmina-SCI

Sanmina-SCI Corporation is a leading electronics contract manufacturer serving the fastest-growing segments of the \$130 billion global electronics manufacturing services (EMS) market. Recognized as a technology leader, Sanmina-SCI provides end-to-end manufacturing solutions, delivering unsurpassed quality and support to large OEMs primarily in the communications, industrial and medical instrumentation, and computer technology sectors of the market. Sanmina-SCI has over 100 facilities strategically located in key regions throughout the world.

About Hatteras Networks

Hatteras Networks is redefining the way carriers think about Ethernet services. Hatteras Networks' Ethernet service edge solutions are leading service providers worldwide to a *\$15 billion* expansion of the Metro Ethernet market, which had previously been limited to the fiber footprint. Historically, T1s and E1s have been the fundamental building block for voice and data business services. Now, service providers can cost-effectively offer up to 45 Mbps Mid-Band Ethernet services over existing copper facilities, enabling businesses to migrate from legacy Frame Relay, ATM and T1/E1 connections to transparent Ethernet services for voice and data business connectivity, infrastructure backhaul and mobile wireless backhaul solutions.

Already deployed on five continents, Hatteras Networks' solutions are enabling a market expansion for carriers that is as significant for business services as "triple play" is for residential. For more information, visit www.hatterasnetworks.com.
